

HOME

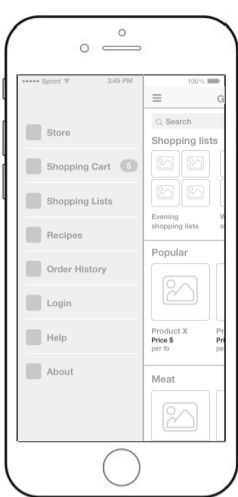

Shopping Cart
Helps to get direct access to shopping cart, observe number of products in the cart, add products from lists through drag & drop feature.

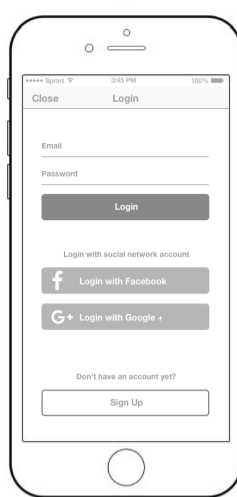

Store Departments
Provides access to list of all grocery departments.

Shopping Lists
Lists of products created by user or automatically generated based on user's favourite (frequently ordered) products. The purpose of these lists is to place important for user products in one place and getting easy access to them everytime, instead of browsing and searching for them over again. Whole shopping list can be added from home page to cart through drag & drop feature. This section will NOT be displayed for users which have not created any shopping list (or have not ordered enough products to generate an accurate list yet).
